What To Do Next

When student completes this packet:

- Check packet for accuracy.
- Ask oral questions and determine next assignment.

Assign packet (check one): ____ Classwork ____ Homework

- Finish this packet.
- Repeat this packet: [Sub 15-19 to 6-9 - word problems](#)
- Assign next packet: [Sub 15-19 to 6-9 - eval](#)
- Assign another packet: _____

Instructions For This Packet

Page 67: Solve the word problem. Then write a math fact from the math solution.

For example:

If $17 - 6 = 11$, then $17 - 11 = 6$ (subtraction fact)

If $11 + 6 = 17$, then $6 + 11 = 17$ (addition fact)

You can also teach them to write math facts that replace addition with subtraction facts.

For example:

If $17 - 6 = 11$, then $11 + 6 = 17$, $6 + 11 = 17$

If $11 + 6 = 17$, then $17 - 6 = 11$, $17 - 11 = 6$

You can encourage students to write all math facts.

If $17 - 6 = 11$, then $17 - 11 = 6$, $11 + 6 = 17$, $6 + 11 = 17$

If $11 + 6 = 17$, then $6 + 11 = 17$, $17 - 6 = 11$, $17 - 11 = 6$
